Priscila Pérez

Software Engineer • Full Stack Developer

priscilaperezherrera@gmail.com • linkedin.com/in/priscila-perez-h • github.com/codesbypriscila • Portfolio

Summary

Software Engineer from the Dominican Republic who builds full stack web applications with **C#, .NET, React, Next.js** and **TypeScript**, from **SQL Server** databases and APIs to the interface, plus **Docker** and **CI/CD** pipelines. Magna Cum Laude graduate in Software Development, now studying Software Engineering. I care about clean code and interfaces that feel well made.

Technical Skills

Backend: C#, .NET, REST APIs, JWT authentication, design patterns

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML, CSS, Motion

Databases: SQL Server, query optimization, caching, database design

DevOps & ways of working: Docker, GitHub Actions, CI/CD, Ansible, Nginx, Prometheus, Grafana, Git, Agile

Work Experience

Software Engineer Dec 2025 – Present

UTreee IT Advanced Solutions *Dominican Republic • Hybrid*

- Build and maintain full stack applications: backend services, frontend features, database design and API integrations, following DevOps practices and Agile methodologies.
- Designed **CI/CD** pipelines and **Docker** setups that make deployments faster and smoother.
- Improved performance with caching and optimized **SQL Server** queries and databases.

IT Intern Sep 2025 – Dec 2025

UTreee IT Advanced Solutions *Distrito Nacional, Dominican Republic*

- Contributed to **IMPERIAL**, a digital invoicing solution with inventory and billing modules, and integrated the **DGII API** for electronic invoicing.
- Turned business requirements into features using design patterns and took part in architecture decisions.

Projects

- **IZUMI** *(Next.js, React, TypeScript, Tailwind CSS, Motion)*: landing page for a fictional omakase restaurant with a custom 3D page-flip menu book and a bilingual EN/ES site. Live demo
- **SadvoApp** *(C#, .NET)*: electronic voting web app for the full election cycle, with areas for administrators, party leaders and voters, and ID card verification with OCR.
- **Survey Manager** *(React, C#, .NET)*: full stack survey platform with role-based JWT authentication, charts and PDF or Excel reports.
- **InvestAtlas** *(C#, .NET)*: ranks countries as investment destinations from macroeconomic indicators and estimates an expected rate of return.
- **DevOps labs** *(Docker, Ansible, Grafana, GitHub Actions)*: Nginx deployed with Ansible, Prometheus and Grafana dashboards, and a CI/CD pipeline that deploys on every push.

Education

Pontificia Universidad Católica Madre y Maestra (PUCMM) Sep 2026 – Present

Software Engineering (in progress) *Dominican Republic*

Instituto Tecnológico de Las Américas (ITLA) Jan 2024 – May 2026

Software Development Technician • Magna Cum Laude • GPA 3.7 *Dominican Republic*

Udemy • *Introduction to Programming with C# (online course)* May 2025 – Jun 2025

Languages

Spanish: Native • **English:** Professional working proficiency
